REQUEST FOR CERTIFICATE OF CORRECTION UNDER 35 U.S.C. § 254 and § 255

The Assignee of record in the above-referenced patent, MKS Instruments, Inc., by virtue of an assignment recorded July 1, 2005 at Reel 016737, Frame 0202, hereby requests that a Certificate of Correction be issued for U.S. Patent No. 6,967,305 under 35 U.S.C § 254 (37 C.F.R. § 1.322) and 35 U.S.C § 255 (37 C.F.R. §§ 1.323).

One of the References Cited on the cover pages of this patent is incorrect. Specifically, on page 2 of the U.S. Patent No. 6,967,305, the Patent Office mistakenly printed the number of the Johnson et al. patent as 6,332,631 instead of 6,332,961. A copy of the cover page of the 6,332,961 patent together with the Examiner's initialed PTO 1449 page listing the Johnson reference correctly as 6,332,961 is enclosed as Appendix A. Assignee respectfully requests that the Commissioner issue a Certificate of Correction under 35 U.S.C § 254 to correct this Patent Office mistake.

Applicant has also made a typographical error in claim number 48. During prosecution, Applicant amended claim 48 to change the antecedent basis of "an inductor of the resonant circuit" to "the inductor of;" as shown in column 19, line 11 of U.S. Patent No. 6,967,305.

JAN 06 2006

Applicants meant to delete the word "of" appearing after the word inductor when the phrase "the resonant circuit" was deleted in the amendment filed on April 28, 2005. Assignee respectfully submits that this mistake is of a clerical nature and occurred in good faith during prosecution. Assignee further submits that correction of this mistake does not constitute the entry of new matter nor would it require reexamination of the patent. Accordingly, Assignee requests that the Commissioner issue a Certificate of Correction under 35 U.S.C § 255 to correct the typographical error in claim 48 by deleting the word "of" appearing in column 19, line 11.

If there are any questions regarding this matter, the U.S. Patent Office is kindly requested to contact the undersigned at the telephone number identified below. The Commissioner is hereby authorized to charge any fee necessary to enter this paper to Attorney's Deposit Account No. 50-3081.

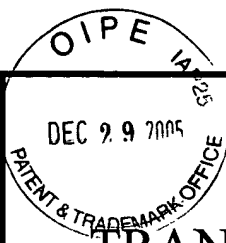

Respectfully submitted,

(57) **ABSTRACT**

A system and method for detecting and preventing arcing in plasma processing systems. Arcing is detected and characterized by measuring and analyzing electrical signals from a circuit coupled to the plasma. After characterization, the electrical signals can then be correlated with arcing events occurring during a processing run. Information can be obtained regarding location, severity, and frequency of arcing events. The system and method better diagnose the causes of arcing and provide improved protection against undesirable arcing, which can cause damage to the system and the workpiece.
